

## FORKLIFT

### Kydex RAM

RAM is adjustable and will remain in the user's chosen position. Kydex is a rugged, nonreactive material that stands up to the rigors of industrial use.

### Magnet

Four rare earth magnets securely attach this holster to any flat, ferrous surface. Robust design stays strong through all user needs.

### Fabric

Bracket secures to forklift while fabric holster provides padded protection for user devices.

### Bracket

Bracket screws onto a self or forklift. Custom molded ruggedized Kydex holster allows for easy insertion and removal of device.

### Wall

With the provided zip ties, the holster attaches to any pole to keep your device secure and in one place.

### Stainless

Included clamp securely mounts onto a pole, whether that be in the factory or on a forklift. Stainless steel is a rugged solution, easily withstanding the rigors of warehouse jobs!

### Clamp

4" clamp is mountable on a stationary pole or on a forklift and remains adjustable to a variety of positions.

### RAM and Bracket

Rugged Polypropylene holster is resistant to many chemicals, and RAM mount facilitates multiple mounting options and viewing angles.
